- Verbal and written communication

Experience

Applications Developer 05/2019 - 03/2025

Software Consulting Services (SCS) Bethlehem PA

- Designed and built a new web portal for a legacy X11 application, improving ad booking efficiency and user experience.
- Enhanced the portal over time by adding features based on user feedback, ensuring continuous improvement and scalability. This site supported entry of over 400,000 ads.
- Led the migration and integration of a full-stack LAMP application after SCS acquired it. Used Java to automate processes for this site, interact with the database and import/export data to other sources.
- Configured and developed custom data imports and exports for integration with external systems, including Zoho Analytics, improving data reporting and analysis.
- Provided ongoing support and troubleshooting for multiple applications, ensuring high availability and user satisfaction.
- Presented new products and features both internally and to outside customers. Provided training on the use of these new features. Presentations were both in person and through Zoom.
- Documented applications and tools for reference across the company.
- Coordinated site surveys for new customers to gather information and determine requirements.
- Handled customer issues through Zendesk ticketing system. Some were able to be handled through emails, others required a phone call or zoom session to troubleshoot with the user.

Operations Specialist / QA Engineer 02/2018 - 03/2019

DrayNow Inc. Conshohocken PA

- Coordinated logistics for the Chicago market, the company's largest, ensuring timely and efficient operations.
- Wrote and optimized SQL queries to gather key data, used Excel to track and create daily checks for rapidly changing information.
- Reported and documented bugs, identifying feature malfunctions and communicating issues to developers, managers, and customers.
- Acted as a liaison between developers, managers, and customers to ensure smooth communication and resolution of issues.
